

# Architecture design

## Group:

PL5 - Totally Awesome Genome Coders

## Members:

Kasper Grabarz	4083245
Thomas Oomens	4422597
Jeffrey Helgers	4318749
Youp Mickers	4246713
Matthijs Rijlaarsdam	4308417

## Deliverable Date:

29-4-2016

## Design goals

- Each week we have a working version for the customer.
- The code is correctly documented and tested.
- The program can run on windows, linux and apple.
- Follow the model view control design principle.

# Software Architecture

Currently our front and back end aren't connected yet. In the following weeks we will connect these two parts. Our idea is to store all the data in the database and the front end reads from this database.
